

Program Specification

Quick Sort

1 PROGRAM DESCRIPTION

Write a method that accepts an unsorted array as a parameter and sorts the elements using the Quick Sort Algorithm

2 INPUT DESCRIPTION

The method should accept a single parameter:

1. An array of double variables

3 OUTPUT DESCRIPTION

Create a driver class with a main method to exercise the Quick Sort method. Print the array before and after the method is called.

4 WHAT TO TURN IN

- Your code
- Multiple documented test cases
