

Program Specification

Pair of Dice

1 PROGRAM DESCRIPTION

Write a class that represents a six-sided die. Using your Die class write a class called PairOfDice, composed of two Die objects. Include methods to set and get the individual die values, a method to roll the dice, and a method that returns the current sum of the two die values.

2 OUTPUT DESCRIPTION

Create a driver class called RollingDice to instantiate and use a PairOfDice object.

3 WHAT TO TURN IN

- Your Code
- Multiple documented test cases
